EDUCATIONAL PARTNERS

**Why should you join our course?**

## Getting the basics right

While it is possible to learn laparoscopy on the job, you can learn it faster by attending our year long course. We teach you the basics by online lectures so that you can watch them repeatedly. Our two day hands-on course on specially designed models prepares you for the real life gruel. You can add-on a live in-OT observation day to complete the whole picture.

## A different approach

Our unique feature is the post-course contact programme. Every month we discuss one surgery in great detail over live conference (zoom). This will prepare you for taking the plunge with pyeloplasty, reimplantation, fundoplication, diaphragmatic hernia, inguinal hernia, UDT and many other surgeries.

**"I have improved a lot ..after the training....I am experiencing it daily..."**

- our delegate

**Move with technology, learn from some of the most enthusiastic experts in India**

## Faculty

**Convenor:**

Dr. Pradeep Shenoy
